EN 13967: 2012

PVC waterproofing sheet RUVIMAT BA15 type T

//width 2m, length 20m, thickness 1.5 mm/

For damp proofing of buildings and underground parts of buildings

Essential characteristics	Working parameters
1. Reaction to fire	Reaction to fire: Class F
2. Watertightness	Watertightness: Pass
3. Tear strength:	Tear strength: - lengthwise - ≥ 150 N; - crosswise - ≥ 150 N;
4. Joint strength:	Joint shear strength: ≥ 600 N/50mm;
5. Resistance to impact	Resistance to impact : NPD ;

6. Tensile strength	Tensile strength: - lengthwise - $\geq 15 \text{ N/mm}^2$; - crosswise - $\geq 15 \text{ N/mm}^2$; Elongation: - lengthwise - $\geq 240\%$; - crosswise - $\geq 240\%$;
7. Resistance to static loading	Resistance to static loading : NPD
8. Durability	Durability : pass ;
9. Dangerous substances	Dangerous substances : NPD
